Belarus, Minsk

English - B1+

Russian - Native

SUMMARY

Senior Mobile Engineer with 4 years of experience shipping production apps across iOS, Android (Flutter & native Kotlin), Web, and Windows. Released 4+ apps to the App Store and built a native Android payment-terminal application for a B2C car-wash chain. Tech Lead experience: led a team of 3 developers, owning architecture, CI/CD, hiring, and client communication. Strong in Clean Architecture, BLoC/Riverpod, performance profiling, hardware integration (NFC, card readers), and end-to-end release pipelines (GitLab, Xcode Cloud, Codemagic)

EXPERIENCE

04/2026 –
Present
Part-Time

KPI DRIVE

Senior Flutter Developer

- Building Flutter Web dashboards for a B2B SaaS platform used by enterprise clients (manufacturing, retail, distribution) to track employee KPIs, tasks, ratings, and payroll in real time
- Implementing data-dense visualization components — KPI matrices, employee rating tables, and performance charts — with interactive filtering and drill-down across multiple reporting periods
- Integrating with internal REST APIs for real-time synchronization of KPI facts, tasks, and analytics; ensuring consistency between web client and backend across high-frequency updates
- **Stack:** Flutter Web, Dart, Bloc/Cubit, Dio, REST, GetIt

04/2025 –
04/2026
Full-Time

NDA

Senior Flutter/Android Developer

- Mobile engineer in a 2-developer team, building internal cross-platform utility applications for Mobile (Flutter & native Android), Web, and Desktop
- Reduced battery consumption by 20% through refactoring background tasks, optimizing polling schedules, and offloading heavy work to coroutines on native Android
- Built custom-rendered chart components with CustomPainter to visualize high-frequency real-time data that standard widget libraries couldn't render smoothly
- **Stack:** Flutter, Dart, Kotlin, Android SDK, Coroutines, Platform Channels, Bloc/Cubit, CustomPainter, Isolates, Flutter DevTools, Android Studio Profiler, GitLab CI/CD

02/2023 –
04/2025
Full-Time

DEVSPARKCLUB

Senior Flutter Developer

- Delivered 6 production cross-platform applications across iOS, Android, Web, and Windows for both B2B and B2C clients — ranging from public consumer products to internal enterprise tools

- Shipped NanoWash mobile — a B2C Flutter app for the robotmoika.by robotic car-wash chain — to App Store and Google Play from a single codebase
- Built NanoWash Payment Terminal — a native Android application in Kotlin for the chain's physical self-service payment kiosks installed at car-wash locations:
 - Integrated with payment hardware (card reader, NFC, receipt printer) and processed transactions end-to-end on-device
 - Synchronized terminal state, pricing, and transactions with the same backend powering the Flutter mobile app — keeping one source of truth across customer-facing and on-site channels
- **Stack:** Flutter, Dart, Kotlin, Android SDK, Riverpod, Bloc/Cubit, Clean Architecture, GitLab CI/CD, Xcode Cloud

09/2023 –
04/2025
Part-Time

FORYOU

Senior Flutter Developer

- Contributed as Senior Flutter developer to three live App Store products in the forYou portfolio:
 - Face Yoga & Skincare — consumer wellness app
 - O'Key AI — AI assistant
 - ESSA AI Job & Career — AI-powered career assistant
- Developed messenger module with realtime communication over WebSockets, integrating with proprietary AI models hosted on the backend for live AI transcription and conversational flows
- **Stack:** Flutter, Dart, BLoC, Dio, WebSockets, Drift, REST

EDUCATION

2020 – 2024

BELARUSIAN STATE TECHNOLOGICAL UNIVERSITY

Bachelor of Information Technology

Belarus, Minsk

SKILLS

- **Core:** Dart, Kotlin, Flutter SDK, Material/Cupertino, CustomPainter, Animations, Isolates
- **Native Android:** Android SDK, Coroutines, Platform Channels, hardware integration (NFC, card readers, receipt printers)
- **State Management:** BLoC/Cubit, Riverpod
- **Architecture:** Clean Architecture, Feature-first modular structure, MVVM, SOLID
- **Networking:** Dio, REST API, GraphQL, WebSockets
- **Performance:** Flutter DevTools, RepaintBoundary, rebuild optimization, isolate / coroutine offloading
- **DI:** GetIt, Injectable
- **Databases:** Hive, Drift, SQLite, Firebase, Supabase
- **Testing:** Unit, Widget, Integration Tests (Mockito)
- **CI/CD:** Codemagic, GitHub Actions, GitLab CI/CD, Xcode Cloud
- **Tools:** Git, Jira, Figma, Postman, Android Studio, Xcode
